Valorizando talentos

The Salesian Mission's heart beating by continuing education

Esteemed UCDB academic community,

It is always with satisfaction we share the achievements of our university. Certainly, an important fact was the commemoration of Don Bosco's birth, the Saint and also educator who inspires our mission of commitment to the formation of good Christians, honest citizens and competent professionals.

The dynamism in this work always requires new parameters and frameworks and also it encourages us to think and develop what to teach and how to do it in order to see the seeds to grow and the fruits mature.

In this edition of UCDB newspaper you will see the preparations for the UCDB Challenge, in its 8th edition, the 2nd edition of "Saberes em Ação" (knowledge in action) which has as main theme "University, innovation, sustainability and social commitment"; the achievements of the group called "Inovisão" dedicated to the applied research collaborating

with the local development and with academics formation, you will also read about the continuing education called "Teia" (web) which develops an important work in Quilombola Indian communities, including their culture and human rights. We are also celebrating the 40th year of beginning the psychology course at our University, preparing ourselves for the Psychology Journey in November 2015.

We highlighted between Don Bosco's bicentennial commemorations, the grand opening-church dedicated to Don Bosco. As best expressed by Pope Francis: a church located in a campus becomes the center of the university, the institution's heart, and from this example emerges the strength of the university, its thoughts and teachings.

We would like to thank the good work accomplished by Deans Br. Altair Monteiro da Silva, Br. Gilliano Mazzetto, Professors Conceição Butera and Luciane Pinho de Almeida, Professor Hemerson Pistori and

all of salesians and lay people, which have been dedicating their times with competence in managing UCDB. Together, we form an exceptional team, which has as compromise to carry on the project, which isn't just a project, a personal project, but a project by Mato Grosso Salesian Mission to the state, Midwest and finally, Brazil.

Ricardo Carlos, the appointed new Dean, we wish you a warm welcome, a shower of blessings and light in conducting UCDB. We as well receive the new Deans: Br. Herivelton Breitenbach, Dean of Administration and Diácono João Vitor Ortiz, Dean of Pastoral. We believe with confidence in the young salesians.

We ask God, Mother Mary and Don Bosco blessings for the University to keep its mission forming professionals engaged on fighting for a better world. Success to all!

Pe. José Marinoni
UCDB's Dean

A phrase from Don Bosco

"Morality is the base for health and study."

Opening Conference of Saberes em Ação will be with sailor Amyr Klink

Innovation, sustainability and social commitment will be the topics discussed in the event

SILVIA TADA

The II Conference of Teaching, Research and Extension Knowledge in Action, promoted by Dom Bosco Catholic University, happens on October 27th and 28th. The opening lecture will be with the sailor Amyr Klink, who has over 30 years of experience in seas of the world. He will talk about the main theme of the event: "University: innovation, sustainability and social commitment", from 27th, 7 pm in the multi-sports courts of the Catholic University.

Author of five books (*Cem dias entre Céu e Mar*, *Parati entre dois pólos*, *As janelas do Parati*, *Mar sem fim e Linha D'Água*), 59-year-old Amyr Klink accumulates experience of 15 trips to Antarctica and has traveled alone for 642 days, and faced a variety of challenges in his

adventures. He must bring to the academics and guests of Saberes em Ação the experience as a sailor and entrepreneur, with a focus on environmental sustainability.

The following day, 28th, hundreds of works on teaching, research and extension will be presented, showing to the academic community all the richness produced by its own members. Lectures, workshops, round tables, products and projects exhibitions and cultural activities are scheduled, in all three periods and in all the blocks of the Catholic University.

The enrollment for participation in the event as a listener and in the workshops can be made from September 21st to October 16th, by the site www.ucdb.br/sabersemacao. Hundreds of works

Famous for his adventures in the sea, Amyr Klink is going to talk with academic community on October 27th

of graduation, post graduation, scientific initiation, extension and exhibition of products were

registered, and the complete list of the accepted people will be available on the hot site of the event.

Academic of UCDB wins fifth title in Brazilian Judo championship

Layana disputes, this year, national leagues and a selective for Rio de Janeiro

JAKSON PEREIRA

One of the biggest promises of Brazilian Judo, academic Layana Colman, of the physical education course from Dom Bosco Catholic University, won her fifth title in Brazilian championship, last month, in Bahia.

In this 18-year-old girl's curriculum, there is a title of Brazilian sub-18, 3 of sub-21 and now one of Sub-23. "I am very happy and relieved to have won this title. All this is a result of a work that has been bringing results", pointed out the judoka representing UCDB in major competitions all over the country and the world.

Constant presence in Brazil in the base selections and permanent

integrant of the selected sub-21, the athlete still has other commitments for this year. "I'm preparing myself to represent well UCDB in the Senior Games, Brazilian Open games and still have the selection process for 2016," he said.

The current winner of the Youth Olympic Games and bronze at the World Game sub-18, Layana points out the support given by the University to go on racing. "Here at UCDB I have all the backing of the teachers and of the sports sector and I feel very happy to be able to represent well the institution," concluded the second semester academic.

UCDB NEWSPAPER: Which skills does the graduation in Nursing at UCDB intend to train professional with?

KARINE COSTA: The graduation in nursing at UCDB intends to train a professional to act with philosophical, ethic, scientific, technical, social and political competences, which develops a generalistic activity in promotion, prevention, recovery and rehabilitation of health at all stages of the life cycle. Throughout his training, the academic will have the opportunity to develop skills and competences, such as: health care; decision-making; communication; leadership and management. The nurse should also have, technical and scientific, ethical and political, social educational competences, contextualized.

UCDB NEWSPAPER: What are the differentials of UCDB course?

KARINE: The curricular framework is composed of 56% of the integrated disciplines with Pharmacy, physiotherapy, and nutrition courses, of which students are trained in the Human Body lessons (160 h/a in the laboratory), Integrated Activities (community services), Biochemistry and Pharmacology, Public Health Policies, Social and Epidemiologic Determinants, Course Conclusion Work (which may be in the area or with specific focus on multidisciplinary team). It composes 44% of the curriculum framework the specific disciplines: history and introduction to nursing; Semiotics and semiology; Women's health, child health, Adult and Elderly Health, public health, Mental health, basic and advanced life support, operating room and Central of Sterile Materials, Nursing in communicable diseases, Hospital Management and in Public Health — with practical classes in the laboratory and in health care units. And the laboratories are equipped with modern materials. The UCDB maintains agreements and partnerships that facilitate academic contact with workplaces and the compulsory internship programs provided by law, in the last year of graduation, with total of 400 h, in the Hospital and public health area (basic and medium-complexity levels)

UCDB NEWSPAPER: How is the course at UCDB?

KARINE: The curricular framework is

Karine Ferreira Costa*

organized in 10 semesters, with working hours of 4800 hours and duration of

five years. The operation shift is diurnal, being expected practical and extracurricular activities in the remaining shifts. There is also the compulsory internship program provided by law, in the last year of graduation, in the Hospital and Public Health area, adding 400 extra hours.

UCDB NEWSPAPER: How is the job market for graduates in Nursing? What are the most promising operation areas of jobs?

KARINE: Nurses correspond to 60% of healthcare workers, and 81% of them work in the private sector. There is a great demand for this professional, whereas Brazil has 0.9 nurses for each 1,000 inhabitants, while the recommendation of World Health Organization is one nurse for each 500 inhabitants. Another tendency passes over from the fact that Brazilians more than 60 years old represent 10% of the population. This demographic change and the technological advancement of medicine are creating a number of new functions in several sectors of the economy, especially in health area. It thereby promotes opportunities in home care field opening a range of options in this area. To those nurses who devite to promote, to keep and to restore the health of people, working in partnership with other professional – doctors, nutritionists, pharmacists, physiotherapists, psychologists etc, there will be plenty of oportunities for job and work. This professional is essential in hospitals, as well as in clinics and health units. The licensee may also conduct theoretical and practical classes in vocational training that train nursing auxiliary and technicians.

*Coordinator of nursing at UCDB. Graduated in Nursing and Social Work; postgraduated in Education; professional in the area of Health and master in Local Development by Catholic University.

UCDB NEWSPAPER: Which skills do the graduations in physical education from UCDB intend to train professionals with?

FABIANE MACEDO: The Physical Education professional graduated at UCDB is prepared to ethical behaviour in their area of knowledge that acts in education, health, sport and leisure. We guarantee to students the theoretical and practical training, focused on expression forms of human movement, favoring the multi and interdisciplinary performance, stimulating collective work, content learning, skills, atitudes and human values, the interaction among teaching, research and extension, among the local reality, job market and national conjuncture, the incentive for production and knowledge socialization, the effective contribution on the improvement of the human being quality of life and encouraging the complementary activities. It helps the student to develop the skills and competencies of ethical and moral posture meeting the performance context, the ability of socialization, the ability to obtain personal and professional space, the competence for listening, the scientific domain, the production of academic and scientific texts, the searching for continuous training, and the capacity to analyse and to suggest solutions to situations raised in the daily professional work.

UCDB NEWSPAPER: What are the differentials of the two courses at UCDB?

FABIANE: The structure of the course, curriculum framework, faculty, internship sites, extension and

research projects – it is thought to approximate the future professional to reality of acting, knowing and reflecting about the ethnic, cultural, political, social, educational and health diversities, resulting in the development of education, effective and efficient research and extension of students and teachers. Therefore, we count on Biology, Anatomy, Physical and nutritional evaluation, Kinesiology and Biomechanics labs and with the sports complex "Gym-School" that contains heated pool, large room of weight training, fitness center room, artistic and rhythmic gymnastics room, athletics track and four covered sports courts.

UCDB NEWSPAPER: How are the courses at UCDB?

KARINE: We think of a flexible and procedural training in distribution of disciplines and traineeships, that are developed from the fourth to the eighth semesters; and, in the development of the final paper, we enable the approach with the community in the compulsory stages, like Scholarship Institutional Program for Begginers Teachers -PIBID and in extension projects: Gym School, Active Child, Physical Evaluation Lab-LAF, New Life and Walking with Health. And, looking for the best quality training and opportunities for students that present greater difficulties learning, we count on the support of the Educational Support Center –NAP to guide our actions. So, we believe that our students will be prepared to act in different alternatives without needing to score school or academy, health and education, sport or leisure, they will be ready for holistic acting that dialogue education, health, sports and leisure in favour of the greater good, which is the quality of life of the human person in different contexts.

Fabiane de Oliveira Macedo is the coordinator of Physical Education courses – licensure and bachelor degree – at Dom Bosco Catholic University. She is specialist in Human Motricity (UFMS) and she has a master's degree in Human Movement Sciences (Udesc).

Fabiane de Oliveira Macedo*

school, or preparatory course with number of registers less than 50 participants, they will take a test at UCDB Pole and will compete for three scholarships of 100%, 70% and 50%.

The ACICG category is destined to employees and members of the affiliated companies who have completed high school and who are not studying or attending higher education. The test will be held at Tamandaré UCDB on October 4th, starting at 8:00 with the duration of 4 hours. The interested applicants should perform their enrolment 2 on the website www.ucdb.br/desafioucdb typing the CNPJ of the affiliated company to ACICG. For 50 to 100 registered applicants a full and a 50% scholarship will be offered. For more than 100 applicants, scholarship of 100%, 80% and 60% will be offered. For less than 50 applicants, the UCDB reserves its own rights of not contemplating candidates with scholarships.

The recommendations for the ACICG category also apply for the challenge UCDB-Fiems, which is destined for the employees who are properly registered in companies associated to a Syndicate linked to Fiems, and for the category PM/MS, destined to police officers.

The test results will be announced on October 16th at UCDB Web site. More information can be obtained at www.ucdb.br/desafioucdb or by the number (67) 3312-3300.

These are UCDB winners, 2014, during the Award Ceremony

UCDB Challenge offers opportunity to earn scholarships

Students, trade and industries workers and police officers can take part in the test on October 3rd and 4th

MARIANA OSTEMBERG

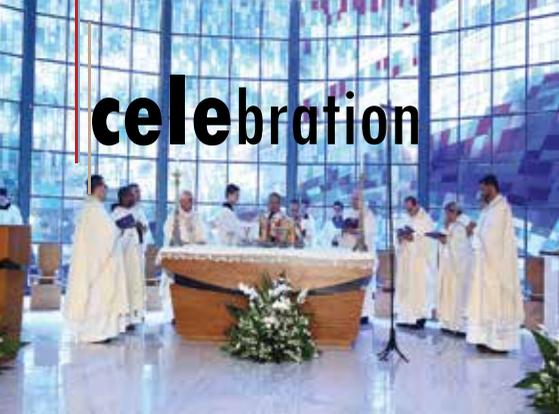

The 8th edition of the UCDB challenge, a project performed annually by the Agency of the future Academic (AFA), the Dom Bosco Catholic University offers four categories this year, such as: UCDB Challenge Schools, destined for students from the last year of high school and preparatory courses; UCDB Challenge – Fiems, for workers associated with the Industry Federation of Mato Grosso do

Sul; UCDB Challenge– ACICG, turned to capital traders linked to the Commercial and Industrial Association of Campo Grande; and UCDB Challenge– PM, in which police officers who are not graduated can take part of it. The enrolments can be done till September 25th, and it costs R\$ 15.00. The School category has the goal of contemplating with scholarships last year high school students and preparatory courses. The test will be held in

partner schools on October 3rd, 2015, it starts at 8:00 and will last for 4 hours. The enrolments can be done by the site www.ucdb.br/desafioucdb. A full scholarship will be offered to each school that obtains the number of 50 to 100 participants – these ones will form a pole. Two scholarships will be offered to the schools that have more than 101 participants one full and the other of 50%. Students from the third grade from high

celebration

Events celebrate Dom Bosco bicentenary

UCDB promoted in August, actions to honor the patron of the institution, bringing together the academic community

SILVIA TADA

With emotion and dedication, the community of Dom Bosco Catholic University celebrated the bicentennial of St. John Bosco birth during August. There were four big events promoted by UCDB, with participation of academics, teachers, partners and religious who honored the Father and Master of Youth.

Thus, the granting of the title of Doctor *Honoris Causa* happened

to the teachers Antonio Brand and Mariluce Bittar, both in memoriam, and to Salesians Pr. Adalberto Heide, Pr. Bartolomeo Giaccaria and Pr. Gonçalo Alberto Ochoa Camargo, on 12th. In this occasion, Brand was represented by his daughter, Luciana Brand, and Mariluce, by his son André Bittar.

The ceremony of Dedication to Dom Bosco Church built at the campus, happened in the mass chair-

red by the Archbishop of Campo Grande, Dom Dimas Lara Barbosa, on 25th. The place was crowded, and the UCDB Dean, Pr. José Marioni, highlighted the importance of the new Church: "Here is the heart of UCDB".

The show "Don Bosco: a voice for us" was presented by groups of culture and art, at the Don Bosco theater, on 30th, attended by a hundred artists of the theatre groups

Sentaque o Leão é Manso, Ararazul dance, Aves Pantaneiras music, UCDB choir and Strings Group.

Another activity, the exhibition *Nossacidade, Nosso Mestre*, a tribute to the anniversary of Campo Grande and the bicentenary of Dom Bosco birth, was held from August 11th to 31st, at Pr. Félix Zavattaro library.

UCDB has new Rectory in October

Pr. Ricardo Carlos will be the new UCDB Dean; Pr. Marinoni takes over the position in Brasília

SILVIA TADA / EDYELK DOS SANTOS

To continue the growth of Dom Bosco Catholic University and improve the indicators of quality of the *Stricto Sensu* graduate programs (masters and Phds) some of the challenges of Pr. Ricardo Carlos, nominated UCDB Dean, replacing Pr. José Marinoni. The leadership change of the best private University of Mato Grosso do Sul happens in October.

There will be changes, too, in the administration of the Rectory, with the arrival of Br. Jacky Breitenbach, replacing Br. Altair Monteiro da Silva, and in Pastoral Pro rectory, which will be under the command of Deacon João Victor Ortiz. Br. Gillianno Mazzetto, consecutively, has assumed the new created Pro Rectory of Institutional Development.

In the beginning this month, Pr. Ricardo was officially presented to the press and highlighted their projects: "there are several indicators, but one of them, in special, we want to increase in the next years: a qualification of Master and PhD degrees. Currently, our programs have concepts of 5 and 6, representing national excellence. We want to achieve the concepts 6 and 7, which is of international excellence. For this, we are committed to doing a job. We are an

institution that goes to the same direction. I believe that society needs to know that we're leaving what was already being done", said the new Dean.

Chancellor of the University and President of the Salesian Mission of Mato Grosso, Pe. Ishtar Mendes dos Santos, commented on the changes at the University: "it was necessary to choose a man who knew how to give continuity to the work, developed for over 20 years by the Pr. José Marinoni. Here we would like to renew our commitment to society, politics, culture, communication, with people from Campo Grande. We want to be an example for our city and for Brazil, since we care about the professional qualification in the future" said Gildásio.

Pr. Marinoni commented about the worked years at the institution. "I would like to say that it's not the University Dean; our job is to coordinate, monitor and see if what was established is being put into practice. Here, we use a tool called navigation chart, which brings goals and projects for the next years. So, what we see now is that will be held as a work of continuity. The institution remains, but we will pass on, so we should have this care for the projects and researches that are developed in here", said Marinoni.

PR. RICARDO CARLOS NEW UCDB DEAN

He was born in São Bernardo do Campo (SP), on February 6th, 1974. He started his religious life at the Salesian House in Araçatuba, when he was 14 years old. He was graduated in Philosophy by UCDB, in Theology by Theological Institute Pio XI and was ordered priest in Piacatu (SP), on December 8th, 2001.

He was coordinator of the studies of pre and post novice in the Social Work Paulo VI, in 2002. In the following years, he alternated between the functions of director and economo of the Salesian community São João Bosco (Dom Bosco Salesian School), in Campo Grande. Between 2012 and 2015, he specialized in Bible studies in Jerusalém.

On August 25th, 2015, his name was announced by the President of the Salesian Mission of Mato Grosso, Pr. Gildásio Mendes dos Santos, as a new UCDB Dean.

BR. HERIVELTON BREITENBACH NEW PRO-RECTOR OF ADMINISTRATION

Br. Herivelton Breitenbach New Pro-rector of Natural Administration of Palotina (PR), Br. Herivelton Breitenbach is graduated in Philosophy by UCDB, and is specialized in Business Management by Salesian Catholic University Center Auxilium in Lins (SP) and Master in Administration by the Methodist University in Piracicaba (SP). In Lins, since 2008, he was general director of the Unit II of Lins Unisaesiano, and in 2010, he took over the Administration Pro Rectory and Community Action at the same institution.

In 2014, he was named Unisaesiano Dean. In January 2015, he once more took over the Administration Pro Rectory and accumulated the functions of Vice Rector and general director of Lins.

DEACON JOÃO VITOR ORTIZ NEW PASTORAL PRO-RECTOR

From Iacanga (SP), João Vitor Ortiz is 27 years old. He started his religious life in Lins (SP) and performed his first job in Indápolis, in 2008. He is graduated in Philosophy by UCDB and in Theology, by Pio XI (SP). He was the Pastoral coordinator in São Vicente Institute and, till he was named for the Pastoral Pro Rectory at UCDB, he was coordinator of the Pre novice in Indápolis.

Teia Project aims the appreciation of black culture

In the Quilombolas communities activities with children, teenagers and adults are developed

GABRIEL BITTAR

What will be the legacy of the contemporary era in relation to popular awareness about the education and rights of African culture in Brazil? To ensure that problems like this don't be suppressed by the individualistic spirit that has been increasingly taking society is that the Teia extension project, from Dom Bosco Catholic University, coordinated by Professor Ma. Victor Hugo de Oliveira Marques and by Professor Ma. Angela Cristina do Rego Catônio, scrambled for black rights, guarantee the preservation of African language and culture in quilombolas communities like Tia Eva and Furnas do Dionísio. Currently, the project has a total of 11 extensionist academics, two scholarship holders from areas of Philosophy, languages and History.

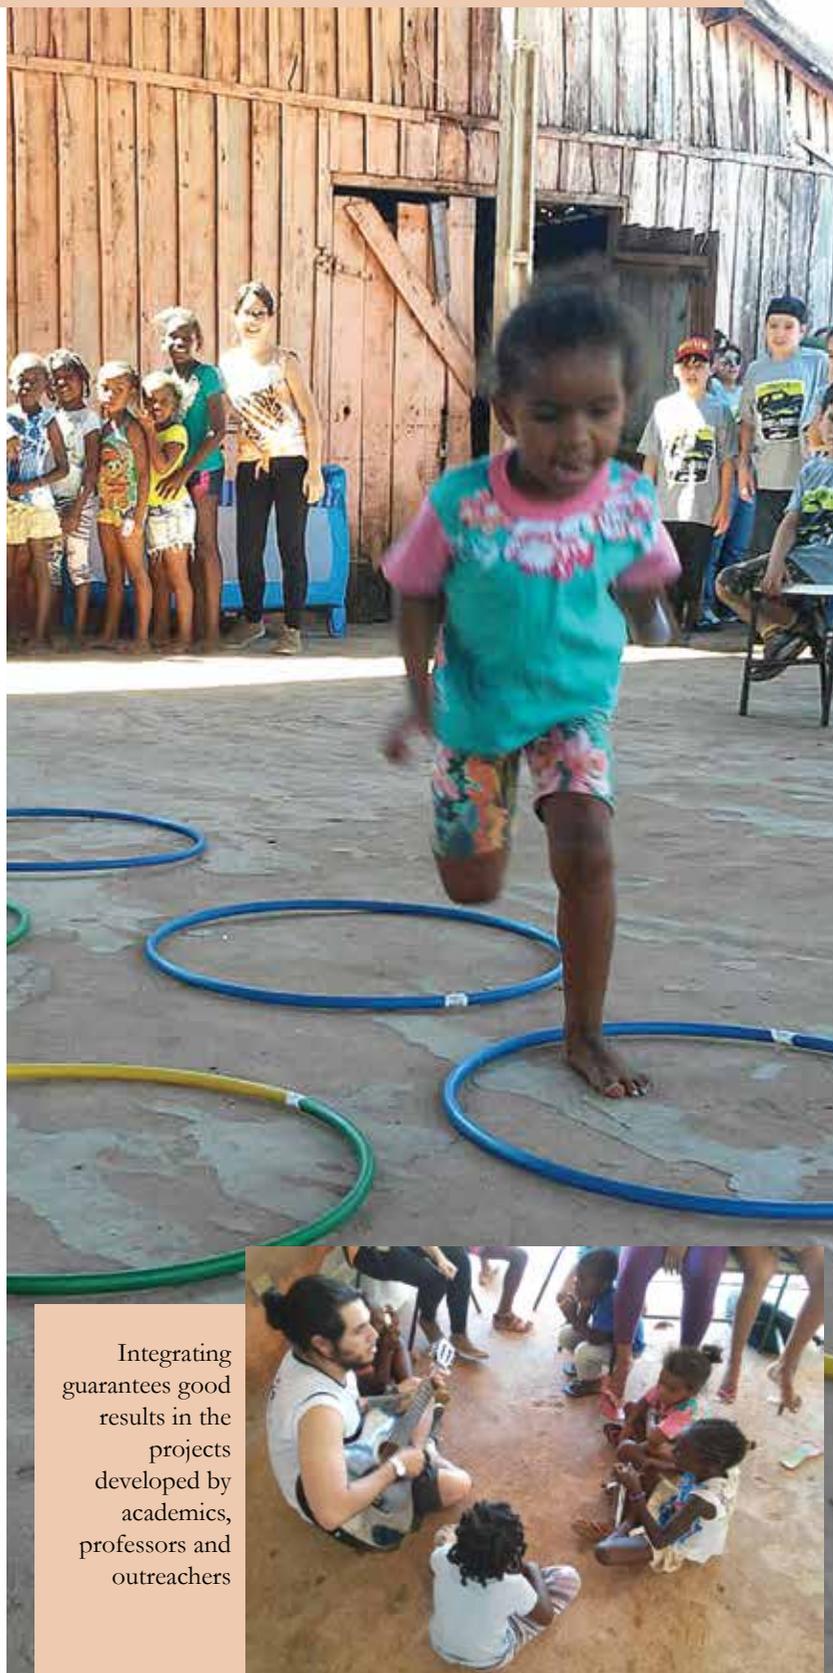

The project has three front lines, respectively called "Teia Journal" (old São Benedito Newspaper), "Group Works" (that performs research and studies about the quilombola communities and Latin American thought) and "Black rights", which creates a link with advices and communities in search of black people rights. "The Teia project is a search for the guarantee of rights, which occurs in several ways. In practice, attending councils, and performing the Teia Newspaper and workshops that help communities to develop", said Coordinator Ma. Victor Hugo.

About the projects developed inside the Quilombola communities and about the Teia Newspaper, for example, Coordinator Ma. Angela Cristina do Rego Catônio pronounced: "in Tia Eva community, there were several

testimonials from teachers who entered the Teia Newspaper in their classes. The community likes to read the newspaper, because most of the topics reported is requested by themselves. It's a newspaper for them".

Teacher Coordinator Ma. Victor Hugo added: "the visits are opportunities to find the quilombolas realities, so that we can better work with them. It is to know the communities in practice, performing the real goal of this extension project, which is helping them in what is possible, always looking for ways to preserve the culture, language and ensure the rights of quilombola communities".

One of the extension project volunteers, academic André Luiz do Prado Alves Jr., who is in the 2nd semester of the Philosophy course, commented on the main work that they developed in the project and the importance of the Teia in the lives of academics. "The project is a search for culture and to ensure the rights of these communities, and we who are extensionists, worked hard in the branches of this project. We form groups of texts, produce the university newsletter and we go to these communities, twice or three times a month and we performed gymkhanas. With these activities, we have become acquainted with them. All of this has contributed a lot to me, in a personal and collective context. The scientific and historical researches we do also have helped me understand better the reality of the quilombola communities", he said.

Integrating guarantees good results in the projects developed by academics, professors and outreachers

The meeting of academics who develop the program

Academics develop a system to an automatic counting of fingerlings based in computing vision

In a partnership with “Pacu Project”, instruments are being studied for work optimizing

EDYELK DOS SANTOS

The Research Group Inovação, composed by academics from Catholic University Dom Bosco (UCDB) has as main goal the development of MatoGrosso do Sul State. Coordinated by the Dr. Professor Hemerson Pistori, from Doctorate Degree in Environmental Science and Sustainability of agricultural activities and also leader of the researching group which develops a system to an automatically counting of fingerlings based in computing vision.

To make this possible, a partnership with Pacu Project was signed and with Instituto Federal de MatoGrosso do Sul (IFMS), they are also counting on the help of teachers Dr. Marco Hiroshi Naka, from Mastering in Biotechnology and from

Masters Vanir Garcia, Doctorate in the program of Environmental Science and Sustainability of agricultural activities, responsible for carrying out the experimental part of this work, which involves the capturing of fingerlings, capturing and image processing and the development of a vision system for counting fish.

“We’ve started the activity to find that, in the company, the fingerlings were counted manually by about eight employees and it used to delay the work generating workforce. But, with this equipment we’ve been developing, the employee will no longer need to perform this step, because our goal is that this count can be done much more quickly by image analysis”, explained Hemerson.

The main objective of the computer vision is the digital

image that can be obtained by an infinity variety of sensors and equipment, from the very common digital cameras, camcorders, smart phones, webcams and security cameras and even the most detailed equipments as microscopes, telescopes, satellites, CT scanners and ultrasound machines and MRI.

According to professor Hemerson, the idea for creating this equipment came from the necessity of the University to be seen as an environmental researching, in which academics could have an opportunity to contribute well to society.

“Not everyone knows, but the University has part of applied research production, in which it helps the development of a region. This is done by creating new devices, which stimulate

the student to learn and want to create a real project, opening new horizons even while in the University”, said the professor.

Another factor that triggered their creation was the interest in developing equipment with domestic technology, since there is a large fish production potential in Brazil, which points to growing producers and the need to implement automated fish counting systems.

For the director of the Pacu Company, Simon Luiz Brum, the partnership with UCDB is a gain for the company and for students. “I am delighted to have this partnership because it is a very valuable help we received from the students and teachers involved in this work. Furthermore, I realize that it is a very big gain for students, because even at the University they have the opportunity to put into practice what is studied in class, so for us it is very satisfying to be part of it” said Simão.

“Experiments will be performed with different digital camera models and structures for transportation of fingerlings through a pipe through water will be pumped from the storage tanks.

“An image database for training and testing of the system will be created and will be identified invariant characteristics to be sought in the images to allow the completion of the count”, detailed Hemerson.

WHAT ARE YOUR WEAKNESSES? ?

During a job interview it is very common that recruiters gather the candidate information, asking things about the routine and also development. One of the most complicated questions to the candidates answer is the critical: What are your weaknesses?

At that time, the candidate is nervous, bewildered and it is common to answer: “I am anxious” and “perfectionist” or, “so suddenly, I cannot answer.” These answers do not imply that

the candidate is blind to their limitations, but it demonstrates lack of knowledge about themselves.

Generally candidates give vague answers or common ones for not being prepared to participate in an interview, even though some questions recur, and when they are exposed to them, they fail to provide a complete and satisfactory answer.

Experts suggest that, before attending an interview for work,

one needs self-reflection, collecting feedback from previous bosses and colleagues. After all, the answer does not point only things to be developed, but also what their level of self-knowledge is.

It is important to speak openly and clearly about weaknesses and limitations related to the opportunity that is running since, at some point, this will come to light during the work, and everything can come down onto you.

Just talking and describing weaknesses is not enough for recruiters; it is important to reveal what actions are being taken to overcome them, and evolution since learning of this limitation and how you made to improve and overcome such failure.

When we talk about weaknesses, these can be either

behavioral context as coach. The interest in performing actions to remedy the difficulties identified draws attention of recruiters, as it demonstrates interest to improve. “The progress is impossible without changing. Those who cannot change their minds, cannot change anything”

Ana Carolina Perroni Lima Morais

“

Progress is impossible without change, and those who cannot change their minds cannot change anything

George Bernard Shaw

”

“Dom Bosco and family”

How to keep a family together, according to Don Bosco?

Basic Optical: “Being loved is not enough, it is necessary to know you are loved”

1 – Your family is valuable: when there is respect, the family grows, advances. Each member knows (or feels) you are interested in him or her just because of the love you feel.

2 – Trust in your family: Even though the most difficult people, they bring generosity and kindness deep inside their hearts. So, it is up to you search and find what is stored in their hearts. Listen to and believe on your family members.

3 – Love and respect your family: Don Bosco said: “If you want to be loved by somebody, love them in advance”. Show them clearly that you are at their side. Look into their eyes. Nobody is the master of anyone. You like your family just because you enjoy seeing each of them growing as people.

4 – Always compliment your family whenever you can (and they deserve it): Be sincere! Who doesn't like praise? All of us like it. Your parents and your brothers need to be stimulated to keep going in the right way. It costs little of us but it is much valuable for our parents and brothers – when they deserve it.

5 – Understand your family: The world is complicated, rude and competitive. It changes every day. Try to understand it and put yourself in your parents and brothers shoes. Try to understand why they are acting in this or that way. Who knows if they are desperate, lost, needing yourself or just a care from you?

6 – Be happy with your family: We all are attracted to a beautiful smile. Happiness and a good humor are as attractive

as honey. You are going to face that everything becomes easy, pleasant and fun when we are really together.

7 – Get close to your family: A friendly approximation is always the ideal. Avoid greater evils, because you give the opportunity to advise on time, preventing before repairing. Live with your family and get to know each of them deeply. Find out “where” everyone is, and “who they are with”, “how they are” and also participate in a solidarity way.”

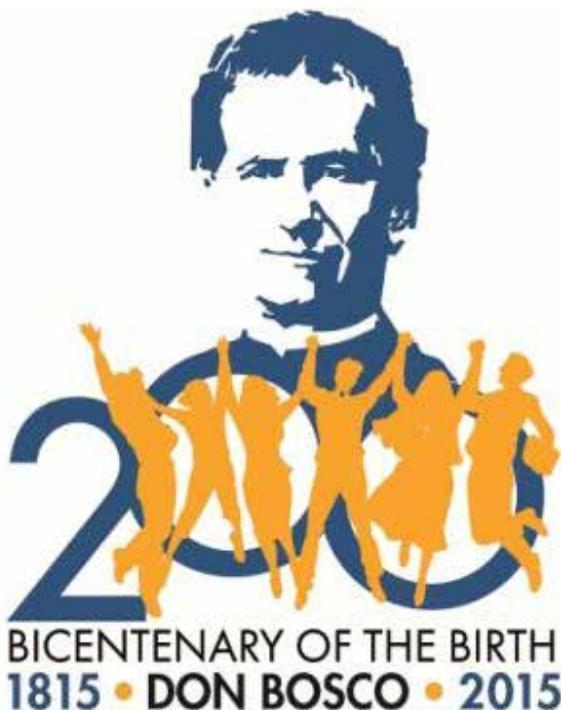

8 – Be consistent with your family. We don't have the right to require from others actions we don't have. Who is not serious cannot demand seriously. And so on. Sometimes we are strict and rude to hide our own weakness and lack of arguments. Our parents and brothers can see all this very well, perhaps because they know us better than we know them.

9 – Preventing is better than punishing or remedying. Don Bosco, who was an exceptional educator, knew that “the strength corrects the defect, but not the addicted”. In his thoughts and practice – The preventive education permits a new happiness and a new sense of living. The punishment hurts, the pain and bitterness remain and separating parents and children. Especially when it is given at the wrong time, in a discussion, for example ... Think twice, three times, SEVEN TIMES! Do not let emotion or anger speak. Ever!

10 – Pray with your family. At first it may seem “strange”. But religion must be fed. Who loves and respects God will love and respect his neighbor. Who is a good Christian, certainly will be a good citizen.

The UCDB Course in Psychology reaches the age of 40 with activities

Graduation is linked to the continuing education and researching and guarantees more complete training for academics

EDYELK DOS SANTOS

Created to deal with the demands of human values when UCDB was Faculdades Unidas Católica de Mato Grosso (Fucmt) yet, the course in Psychology at Catholic

University Dom Bosco (UCDB) reaches 40 years of operation. The graduation aims not only working with disciplines in the classroom, but also develops projects and continuing education programs, and also researches.

According to the course coordinator, Renan da Cunha Soares Junior, the course was created on August 18th, 1975. "One year after its creation the course changed from licentiate to bachelor. Nowadays, we can say that 60% of the labor market professionals were graduated at

UCDB", said Renan.

At first, the course had as main goal the clinical psychology, educational and organizational, but nowadays it is worked in an up-to-dated way related to the health and psychological assessment process.

"In the course we've got many valuing stories, that's why we give importance for the researching, because it is part of our history and it will remain remembered from all your years of studies. It is very important by the fact that the trained professional always back for specializing and in addition we've got students that participate in exchanges" said the teacher.

Aldenor Batista da Silva Junior, 22 years old, 9th semester in Psychology, back from an exchange program in "Pontífica

Universidad Católica de Chile", where he stayed for five months, contemplated by a scholarship "Ibero-Americana" from Santander Bank. "The exchange extends our vision about human and cultural diversity and it is fundamental to the psychologists work. I also had already had contact with another language and interaction with students and professionalsof psychology area in another country, which contributed significantly for my learning. The personal enrichment that is gained to getting out of our comfort zone and learning to manage our lives in all aspects is very rewarding; this is an experience I recommend to all future psychologists. I believe the university should encourage more this culture exchange, aimed at the exchange of experiences", he said.

Academic Kathielly Simões Albres Abadie, 22 years old, 6th semester in Psychology, is part of "PIBIC", a researching project called "Relações Humanas Contemporâneas: a sociabilidade virtual", oriented by Professor Eduardo Cavalheiro Pelliccioli, linked to the Researching Project: "Análise de ações das práticas de cuidado e atenção à saúde na

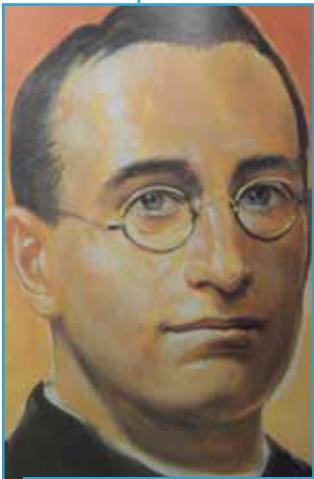

sua interseção com as políticas públicas".

"For me, the scientific researching has been contributing to a new mentality formation by means of the techniques and method learning that assist in an analytical mind formation. It helps to develop solutions of capacity proposition and analysis results, optimizing and deepening the studies in specific areas of knowledge".

In addition to expanding intellectual horizons, the scientific research contributes to the enrichment of critical thinking. Thus, it becomes easier and enjoyable the learning research, generating positive consequences, for example, acting in a more proactive way into the labor market, encouraging them to continue their studies through master's and doctorate, as well as encouraging the development of new projects".

For celebrating the course anniversary, from November 3rd to 7th will happen the Psychology journey. The event will bring main topics to be discussed: Social Psychology (poverty), Psychologist's Performance front issues related to sexuality, Forensic Psychology (Performance in prison system) Clinical Approaches in Cognitive Behavioral Therapy and Clinical Approaches in psychoanalysis, workshops about art therapy, neuropsychology, traffic psychology are being scheduled, among others. The organization is being held by Psychology's coordination, Academic Psychology Center, UCDB's Liga Acadêmica de Psicanálise and Atlético Acadêmica de Psicologia. The event will have the support of the Regional Psychology Council of MS.

**HENRIQUE SAIZ APARICIO
and his 62 PARTNERS**

During the Spanish Civil War, from 1936 to 1939, a wide range of priests, religious, Christian laypeople were killed. The martyred Salesian family members

are in total 95. Seville and Madrid group are a total sum of 63 martyrs.

Fr. Henrique Saiz Aparicio was a brave principal of Salesian Aspirant in Carabanchel (on the periphery of that area - Madrid). When the militiamen broke out at the institute, he promptly said: "If you want blood, here I am. But do not any harm to my children. "The young people were released, while Fr. Saiz and eight Salesians were arrested and then killed. Shortly before he died, he revealed to a friend: "What's better than dying for the glory of God?". He offered his life in exchange for the lives of young people who had been entrusted to him by

Providence and even his last breath was for them.

MADRID

Benedict XVI have issued the decree on the martyrdom on June 26th, 2006 and beatified them on October 28th, 2007.

The texts "Salesian Sanctity" published in UCDB Newspaper since 268th edition, (In October, 2012), were originally published in the book "Santos da Família Salesiana" written by Enrico Dal Covolo and Giorgio Mocci

ZEFERINO NAMUNCURÁ

1886 - 1905

Zeferino Namuncurá was born in Chimpay, Rio Negro Province, Argentina, on August 26th, 1886 and he was baptized two years later by the Apostle of the

Indigenous people, the Salesian Missionary Father Domingo Milanesio.

He was the son of the famous Araucan Chief (Cacique in South America), Manuel Namuncurá (after he would receive the title of Colonel by the Argentinean government) and he was called the "King of the Pampa" by the indigenous peoples.

The initially name was Morales, but his changed it to "Ceferino." When the boy was 11, Manuel decided that his son should study in Buenos Aires to be able to help his people, the Mapuches.

His mother, Rosario, a young woman from Chile, used to say: "Ceferino, since he was very small, used to think as a grown man already". Thanks to the help of Mgr Cagliero, the boy was accepted in the Pio IX Salesian College in Buenos Aires. He received there his First Communion on September 8, 1898. Since then, he became an angel of love to Jesus and to Mary. Studying the Catechism, he dreamt to be a missionary of his people that was living in the mountains. Health issues caused him to move from Buenos

Aires to Viedma where he continued his studies with much dedication getting the admiration of many for his virtues. In 1904 he was brought to Turin and Rome by Mgr Cagliero, Bishop of the Patagonia and later Cardinal. In Italian schools, Zeferino was surprising for companions and teachers for his admirable behavior, his deep piety and his life as a model of virtues. Especially in his long sickness was proven his holiness. Witnesses in the "Fatebenefratelli" Hospital said that Ceferino never lamented, asked nothing

and was helpful to others, giving courage and consolation. Zeferino returned to the House of the Father during the morning of May 11th, 1905, when he was only 18 years and 9 months old. His salm was buried in Rome, but in 1924 was brought back to Argentina and placed in a small chapel in Fortín Mercedes, but after moved to the Sanctuary of Mary Help of Christians in that city. Zeferino Namuncura was declared venerable by Pope John Paul on July 22nd, 1972 and beatified on November 11th, 2007 by Pope Benedict.
